The prize pools, which was provided by Poker Stars for the weekly VIP tournaments have also been increased after the various changes which was made to the VIP status level point requirements.

Previously it was \$50,000 for the weekly VIP Freeroll prize pool at present the same has been increased by 50% more which is now \$75,000! And this will be featured by 12 minute blinds in the event.

It should also be noted that the 100 FPP buy-in should be \$20,000 weekly VIP event again there is a 50% increase in the prize pool and it is valued at \$30,000 prize pool.

Due to the increase in the prize pool provided for the VIP club member, the overall value for the PokerStars marketing code VIP events will be budgeted for \$6.5 million per year, this is without considering any kind of special VIP events! If there are any extra, then the capital will be more.

If you are already a VIP player, then you must be happy about this change, especially if you were able to make a consistent play, even if you are trying to reach the level, it should be glad news because of the decrease in the number of points needed.
